

FABBIO INTERNATIONAL

The desire to share the enormous amount of knowledge was born, together with the Italian style and the maniacal care for details. In 2006 we approach the international market. In 2012 Fabbio USA is born in California, together with the dream to be able to face even bigger and more complex challenges, to collaborate with important planning studios, to interact and face clients who are looking for a more than average dedication for specific projects and international needs and tastes.

In 2015 we cross another ocean to approach the Asian market. In Shanghai we open our showroom in order to be next to the most important global interior design brands. The constant need to adapt to specific requests coming from every part of the world in which we work and the interaction with global architecture studios give us the strenght to adapt to every style and tradition bringing with us those unique details that make Fabbio Design products precious.

Workable in all sizes

MADE IN ITALY

Our products are thought, drawn, produced and assembled in Italy. We are proud to bring into the world the Italian design and traditions, to have the possibility of producing personally every single piece of our collection in order to guarantee the unique Italian style. Frames, doors, shutters that become unique and exclusive objects since they are created one by one by artisans that have kept in their hands the old knowledge of Beauty.

WE ARE!

Choosing to work with us means entering into a unique structure able to guarantee a very tight relationship with those who plan, furnish and build, to always propose concrete solutions that can be a bridge between planners and clients. We can give answers to any specific request with constant assistance to planning. Our doors and windows are tailored clothes, unique objects that are taken care of from their ideation up to their implementation. We'll never tell you "This can't be done" - where others stop, we start.

A BEAUTIFUL STORY

The years of a tree can be discovered only by looking at its trunk, at the concentric rings that tell its story. Our first circumference is the family joinery, carrier of the first lymph, rich of knowledge and tradition - the one that allowed us to grow up strong and aware. The rings increase and push themselves towards constant innovations, towards the willingness to reply to an incredibly high qualitative standard and to plant roots more and more distant from us, in order to touch anything outside the box, anything that brings within originality and innovation. Our tree is made up by a cortex of knowledge and professionalism and leaves different from one another. Branches so long that they can reach any single place in the world. They can get to the United States, to Greece, Russia, Asia, Israel. Every ring of ours is a new project because it is a source of experimentation, growth, renewal.
